

# Ask Yourself...

- Are you operating as efficiently as possible?
- Do your processes work together?
- Do you know what the future holds regarding quality, environmental, and health and safety management systems?

We would like to be your  
improvement resource!

business

# What Business Owners and Managers Should Know About **TEAM**

Here's what  
**TEAM**  
can do for you:

- TEAM works with you to improve your processes and increase efficiency.
- TEAM helps you to protect your margins by reducing waste and improving yields.
- TEAM can provide you with systems that will give you the information needed to run your business more effectively. You need to know when the processes are not working the way that they should, so you can act immediately.
- TEAM professionals have current expertise, and can function as the environmental and quality system experts for your organization. This saves you from hiring full-time people, and maintaining the current expertise in-house. This will reduce your costs and assure that you get the job done quickly.
- TEAM knows: process improvement begins with the hourly employees. We communicate with your employees to assure that they know the right things to do, and are aware of the cost of waste on a per unit basis. We provide written programs that employees can understand to improve your profitability.
